- Consulting and freelance

PROFILE

Field services engineer with more than three years at Huawei Technologies Lanka, delivering and supporting multi-domain enterprise infrastructure for finance, telecom, government, defence, education and hospitality customers across Sri Lanka and the Maldives. I take solutions from proof of concept through implementation, acceptance and handover, then own them in after-sales support. Cyber security graduate and National Champion of the Huawei ICT Competition 2022/23 (Network Track).

KEY NUMBERS

106+ proofs of concept	175+ deployments	5+ after-sales cases a day	12k+ users on one managed Wi-Fi platform	250+ branches on one SD-WAN	300+ PB object storage across two sites
----------------------------------	----------------------------	--------------------------------------	--	---------------------------------------	---

EXPERIENCE

Field Services Engineer · Huawei Technologies Lanka Feb 2024 – Present
Enterprise Business Group · Colombo · projects across Sri Lanka and the Maldives · promoted from intern

- First Huawei SD-WAN in Sri Lanka:** delivered for a financial-sector customer under an ISP-managed model, scaling from 62 MPLS branches to 250+ multi-link branches with ZTP, SLA probes, application-based routing, QoS, IPSec, dual-gateway HA, BGP EVPN, VRRP and AV/IPS.
- SD-WAN for a major government agency:** low-level design, head-office and controller deployment, branch-by-branch cutover and testing on iMaster NCE-Campus.
- Managed Wi-Fi at ISP scale:** multi-tenant CloudCampus on an ISP private cloud serving 12,000+ users, 5,000+ devices and 400+ tenants, with batch, ZTP and feature templates.
- Enterprise WLAN:** 5 to 300 APs per site for universities, banks and enterprises, with 802.1X, MAC bypass, portal and guest access, RF, roaming and mesh tuning.
- Data centre and HCI:** DCS clusters of up to 10 nodes, 1,000 vCPUs and 300+ VMs with UltraVR and eBackup; HCI upgrades across primary and DR sites with 200+ VMs per site; live migration from legacy and physical workloads.
- Storage and data protection:** distributed object storage of 300+ PB across primary and DR sites for a telecom operator, and 500+ TB immutable backup with WORM retention for a commercial bank.
- Proofs of concept:** 106+ POCs across data centre, storage, SD-WAN, WLAN and network access control, from lab build to customer demonstration.
- After-sales and maintenance:** 5+ cases a day; L1 troubleshooting, root-cause analysis and escalation to TAC, GSC and R&D; upgrades, patches and part replacements under change control.
- Documentation and enablement:** LLDs, RFCs, MOPs, SoWs, UAT plans and RCA reports; partner and customer training on SD-WAN, switching, routing, storage and NCE-Campus; intern mentoring.

- **Also delivered:** GPON (OLT, ONT, eSight) for campuses and multi-island resorts, IdeaHub and Smart Classroom collaboration, and IVS3800 surveillance for ports, logistics and oil and gas.

Internship Trainee · Huawei Technologies Lanka

May 2023 – Feb 2024

Enterprise Business Group · Colombo

- Rotated through networking, wireless, data centre and security delivery, then promoted to Field Services Engineer.

TECHNICAL SKILLS

Data centre and virtualisation

Huawei DCS: FusionCompute, eDME, UltraVR, eBackup; FusionCube HCI; MigrationDirector; HA and DR design

Routing, switching and SD-WAN

AR routers, CloudEngine switches, iMaster NCE-Campus; BGP, OSPF, VRRP, EVPN, M-LAG, QoS, IPSec, ZTP

Security

HiSecEngine firewalls (AV, IPS, URL and application control), NAC policy, ACL design, device hardening

Storage and backup

OceanStor Dorado (all-flash SAN/NAS), OceanStor Pacific (S3, NFS, HDFS), OceanProtect, replication, WORM

Wireless and access

AirEngine WLAN, CloudCampus, CampusInsight; 802.1X, MAC and portal authentication, RADIUS, HWTACACS

Optical, collaboration and video

GPON (OLT, ONT), eSight; IdeaHub, Smart Classroom, SMC; IVS3800 surveillance

SERVICES I WORK ACROSS

Implementation and delivery

Proofs of concept

After-sales support

L1 troubleshooting

Maintenance

Documentation

Solution consulting

Partner training

CREDENTIALS AND AWARDS

National Champion, Huawei ICT Competition 2022/23

Network Track, Sri Lanka; represented the country at the regional round in Indonesia

OceanStor Dorado Storage Administrator

Huawei Global Training Center, July 2024

Peer-reviewed research, healthcare IoT security

ResearchGate, 2022

EDUCATION

BSc (Hons) Information Technology, Cyber Security

Sri Lanka Institute of Information Technology (SLIIT), 2024

LANGUAGES

English

Professional working proficiency

Sinhala

Native

PROJECTS ON GITHUB

- **PishCatcher:** Chrome extension for phishing detection using deep learning.
- **God's Eye:** machine-learning malware detection web UI, and a phishing-detection Chrome extension.
- **SecurePy:** VS Code extension that uses Bandit static analysis to find and fix security issues in Python code.

AVAILABILITY

Open to presales and post-sales engineering roles in network, data centre and storage. Ready to relocate with one month's notice and no bond. Available for solution consulting, freelance implementation and collaborations. References available on request.
